

Product Designer with 6+ years of experience designing complex digital products across banking, telecom, and consulting environments. Experienced in leading end-to-end product design, driving business outcomes through user-centered design, and collaborating with cross-functional teams in agile environments.

Experience

Product Designer // Vakıfbank

Oct 2022 - Present

VakıfBank is one of Turkey’s largest banks, providing digital banking services to nearly 14 million customers nationwide.

- Redesigned critical banking journeys used by millions of customers, including payments, accounts, cards, trading and loan management.
- Defined information architecture for core banking experiences, increasing navigation directness from **49% to 84%** through tree testing.
- Designed an internal platform supporting AI/ML workflows, including dataset creation, labeling, and model training.

UX Lead (Product Designer) // Vodafone

May 2021 - Oct 2022

Vodafone Turkey is a leading telecommunications and digital services company serving over 25 million users nationwide.

- Led end-to-end product design for Vodafone’s Upgrade and Mobile Acquisition journeys as the UX designer in a cross-functional squad.
- Improved critical telco journeys—including add-on purchases, tariff changes, new line applications, and My Rewards—contributing to a **+149% MoM** uplift in My Rewards KPIs and a **24% increase** in new line application success.
- Leveraged qualitative and quantitative insights—including funnels, KPIs, TNPS, user feedback, and Adobe Analytics(Omniture)—to inform product decisions alongside the Product Lead.
- Facilitated team workshops, coordinated usability testing with the research team, partnered with UX agencies on external research projects, and conducted A/B tests to validate design improvements.

UX Designer & Researcher // Userspots

June 2019 - May 2021

Userspots is a UX/UI company serving 200+ clients with human-centered solutions built through multi-method user research, strategy, and design.

- Delivered end-to-end UX/UI solutions across diverse client projects and co-defined product strategies with Product Managers.
- Conducted end-to-end research across **12 client projects** using interviews, usability testing, card sorting, tree testing, and heuristic evaluations, translating findings into actionable insights, personas, journey maps, and mental models.
- Improved cross-platform experiences across telecom, e-commerce, healthcare, insurance, and finance by delivering end-to-end UX/UI solutions and aligning with stakeholders and C-level teams.
